To D2L Employer

---

Dear Alias,

I am very excited about the possibility of joining the D2L team as an Technology summer Intern! I believe I'd be a great fit for the role. I'm currently a 2B Computer Science student at University of Waterloo.

I offer strong programming skills with C, C++, Java and Python. I am currently learning object oriented programming with Java and C++ and am reinforcing my knowledge by designing and developing a 2D Platform game in Java using libGDX. I also possess strong knowledge of web development tools - including HTML, CSS, Javascript (including jQuery) and am currently self learning PHP. I am confident in producing high quality products and have had experience designing responsive websites such as a portfolio website and my own personal website where I designed all the background images and icons using Adobe Illustrator. My strong conceptualization ability allows me to picture and create work that is refined and unique.

In addition to these skills, I am quick to learn and adaptable to new environments. As a Computer Science student, I have had the opportunity to interact with diverse people and have proven to complete tasks not only on time but efficiently as well. I believe I'll be able to thrive in your workplace.

Please feel free to contact me. I'd love to hear from you!

Thank you for your time,

Amber Lee
